

## ***Protect your Warranty***

*In October 2003 European new legislation affecting the motor industry came into force called "**Block Exemption Regulation**" 14002002 (BER).*

*Before the law changed it was difficult to have new cars within their warranty period serviced outside a franchised dealer. The new law now allows everyone the freedom to service their car away from the main dealers, **and still have their warranty protected.***

***At Mercury Car Centre your car will be serviced according to the manufacturers service schedule:***

- *It will be fitted with parts compliant to the guidelines*
- *Qualified technicians will carry out the work to a high standard ensuring your service book history is maintained*
- *This will preserve any existing warranty, which later will help with the resale value of your car.*
